

Welcome

Affordable Health Care Services, Inc. is dedicated to providing safe, quality, and cost effective home health care services to all clients. Our goal is to meet the client's medical needs in the nurturing environment of his/her home, minimize the impact of the client's condition on the family, and respect the role of the family in the care of the client.

Advantages of Home Health Care

- ▣ When a patient stays at home, recovery is faster and goes more smoothly
- ▣ No effort exerted in traveling to doctor's appointments
- ▣ It is less costly alternative to nursing homes and rehab centers

You will be qualified to receive Home Health Care if you:

- ▣ are unable to leave home unescorted
- ▣ require professional care and attention apart from what your family can provide; or
- ▣ need assistance with recovery but don't have to be confined to a medical facility as recommended by your physician

Criteria for Admission

- ▣ Your physician must recommend home health care for you – usually if you are homebound
- ▣ There should be a care plan recommended by your doctor which does not require you to be confined in the hospital
- ▣ Your home has to be within our service area
- ▣ You and your family members must actively participate in the care program to foster speedy recovery

How does the patient enroll in our services?

- ▣ Referred by your primary physicians
- ▣ Referred by your community, friends, clergy, etc.
- ▣ Self Referral
- ▣ Discharged from a hospital or nursing home

Who pays for our services?

- ▣ Our services are usually paid in full and in part by Medicare or other private insurance or private payment.

A Licensed and Certified Home Health Care Agency

Affordable Health Care Services, Inc. was founded on May 1, 2006 since then, our staff provide satisfied clients with quality and affordable services.

POLICY:

The provision of home health services is guided by the philosophy of AHCS.

- ▣ To provide all levels of home care service in collaboration with physicians, thus allowing patients to remain in their own homes.
- ▣ To provide a broad base of services with patient demand governing the scope, allowing patients to be involved in establishing, implementing, and evaluating services.
- ▣ To maintain patients in they're homes as long as possible and provide services in the least restrictive setting.
- ▣ To assist patients in using all restorative methods, tools, and procedures to return patients to their optimal level of function.

- ▣ To provide cost-competitive, quality services.
- ▣ To develop a relationship with referral sources to effectively meet our patients' home care needs.
- ▣ To function as a liaison between our patients and available community resources and assist our patients in coping with their needs and problems.
